TECHNICAL SKILLS

Languages & Frameworks: Kotlin (Compose, XML), Java, TypeScript (React, Node), Python, HTML, CSS
Technologies & Tools: Android Studio | Kibana | AWS | Jira | Git/Bitbucket | Figma | MongoDB

EXPERIENCE

Lowe's, Charlotte, NC

Software Engineer July 2026 - Present

- Developed MyLow Companion, a native Android AI assistant used by ~250k Lowe's store associates on Zebra devices, built with MVVM and XML Views
- Led a quarterly app release as release captain, coordinating regression testing and a 5-stage rollout to 5.6M devices with engineering and product. Monitored stability and saturation in Crashlytics, Kibana, and Grafana at each stage, identifying and resolving crashes as they surfaced

UIC Payments, Fremont, CA

Software Engineer October 2025 - July 2026

- Engineered a native Android POS application utilizing MVVM architecture and Jetpack Compose for NEXGO terminals, designing responsive layouts tailored to diverse screen sizes and physical inputs
- Achieved near-100% transaction reliability in production by systematically addressing edge cases, resolving only one reported transaction flow failure across all active deployments
- Drove the development of a custom Android launcher capable of receiving remote MQTT commands, facilitating automated operations such as terminal reboots and OTA updates

Agrofocal Technologies, San Jose, CA

Software Developer January 2024 - October 2025

- Automated data validation workflows through monitoring solutions (PyMongo, boto3, Cron), reducing manual oversight by 10+ hours per week
- Designed an OTA update pipeline cutting end-to-end software build and deployment time from 5+ hours per release to a fully automated process
- Led the development of a React admin portal and an ArcGIS geospatial visualization tool, reducing cross-team coordination by ~80% and custom reporting requests by ~50%

Software Developer Intern & Co-op July 2022 - December 2023

- Implemented an OpenCV motion tracking algorithm on Android, reducing server-side image processing overhead by ~50%
- Addressed RTSP video streaming bottlenecks on Android cameras via video encoding optimizations, maintaining target FPS and near-zero frame drops

EDUCATION

Northeastern University September 2020 - December 2023
Bachelor of Science in Computer Science Boston, MA
